

I am a Math Teacher.

I have accomplished PGCE and have commenced the Masters in Education program from Sunderland University, UK. I have been working at the Swiss International School, Basel for the past 3 years as a Math Support Teacher, Math Olympiad Exam Coordinator, along with a few other roles. Training students for Advance Math and training slow learners is where my expertise lies.

Additionally, I also extend home tutorial services on a one-on-one as well as group basis to Primary Advance & Middle School students. I customize my offering based on the learning capabilities of the students as mentioned below.

Tanvi Shah

Regular Learners

Regular Math Learners shall receive assistance for homework and classwork problems. Real life mathematical scenarios and logic based questions will be solved and discussed in detail to enhance number-crunching abilities and sharpen mental calculations.

Advance Learners

Math for Advance Learners focuses on a competitive and fun way of learning and problem solving. Students will develop intuitive and cognitive thinking skills. They will not only learn new material, but will apply their previous knowledge from school to fun and challenging problems. They will learn to view math not as a set of rules or guidelines, but as an art. Additionally we will practice for math Olympiads and the Känguru competitions.

Learners With Dyscalculia

Math is all about practice, practice and practice. Students with Dyscalculia will work on curriculum based customized math worksheets which are designed keeping in mind their level of expertise.

My target is to develop strong fundamentals and confidence in math.
